All classes of society in a republican government, like our own, dependant for the percetuity of its institutions, alone on an enlightened public sentiment, require some knowledge of the legal onactments, upon which their lives, their liberties, and their fortunes, depend.

The laws of Mississippi, of a general nature, as enacted by her successive logislatures, lie scatterenacted by her successive logislatures, lie scattered in numerous volumes, buried under a mass of private acts, of importance to those alone who are directly interested in their provisions, and offering by their bulk, and the want of arrangement, an almost insuperable barrier to that general disemination of their contents, amongst the great mass of the people, which their importance would seem to

Holly Springs, April 20, 1838. HAMORRHOUS OR PHES vary very much in size and form, are either external or internal and depend on general or local causes, as injury done to the parts, by the frequent passage of in-

durated or hardened stools, use of alootic purgue, long continued exercise in the erect posture, sitting on a cold or a damp seat, discases of the liver; constant purging with drastic medicines, riding on horse-back, costiveness of the howels, irregular habits; sedemary occupations, &.
The symtoms which they occasion may be divided into such as occur in accidental piles, and such as attend permanent piles. Accidental piles are frequently attended with a sense of heat and pain at the extremity of the rectum or lowest intestine and in the loins, head sche and giddiness, flatulence, and not uncommonly marks of general feverishness such as dryness of the mouth and fauces, scanty

and high colored urine, forred tongue, with a frequent desire to vold the urine and faces. The evacuation by the bowels is painful, and very often occasions the tumors to bleed. The perma-nent organized piles moduce in many instances a degree of inconvenience which interferes most seriously with the active daties and comforts of life. Even when altogether internal, they anpede by their bulk the passage of the faces, give ase to se vere pain whenever the bowels are entied, and gradually bring on that train of evils which necessarily follows long cortinued constipation.

When the piles are external they often swell enormously; are very tender, however small they may be, and sometimes ulcerated.
